NOTES TO THE SUMMARISED CONSOLIDATED FINANCIAL STATEMENTS

for the year ended 30 September 2016

1. BASIS OF PREPARATION

The summarised consolidated financial statements are prepared in accordance with the requirements of the JSE Limited Listings Requirements for preliminary reports, and the requirements of the Companies Act, 71 of 2008, applicable to summary financial statements. The Listings Requirements require preliminary reports to be prepared in accordance with the framework concepts and the measurement and recognition requirements of International Financial Reporting Standards (IFRS) and the SAICA Financial Reporting Guides as issued by the Accounting Practices Committee and Financial Pronouncements as issued by Financial Reporting Standards Council and to also, as a minimum, contain the information required by IAS 34 Interim Financial Reporting. The accounting policies applied in the preparation of the consolidated financial statements from which the summary consolidated financial statements were derived are in terms of International Financial Reporting Standards and are consistent with those accounting policies applied in the preparation of the previous consolidated financial statements.

The summarised financial information was prepared under the supervision of the Group financial director, I Soomra CA(SA).

The auditors, Deloitte & Touche, have issued their unmodified audit opinion on the consolidated financial statements for the year ended 30 September 2016. The audit was conducted in accordance with International Standards on Auditing. These preliminary summarised financial statements have been derived from the consolidated financial statements, with which they are consistent in all material respects. These preliminary summarised financial statements have been audited by the company's auditors who have issued an unmodified opinion. Copies of the audit reports and annual financial statements are available for inspection at the company's registered office. The audit report does not necessarily cover all the information contained in this announcement. Shareholders are therefore advised that in order to obtain a full understanding of the nature of the auditor's work they should obtain a copy of that report together with the accompanying financial information from the company's website or from the registered office of the company.

Any reference to future financial performance or prospects included in this announcement has not been reviewed or reported on by the company's auditors.

2. RESTATEMENT OF THE FINANCIAL RESULTS FOR THE YEAR ENDED 30 SEPTEMBER 2015

The audited financial results for the year ended 30 September 2015 have been restated as to:

2.1 The finalisation of the purchase price allocation of the Daybrook business combination

The Group acquired a 100% beneficial shareholding in Daybrook Fisheries Incorporated in the prior year. The initial accounting for the Daybrook business combination in the prior year was prepared using provisional values as permitted in terms of IFRS 3 *Business Combinations* paragraph 45. Subsequent to the end of the prior reporting period the Daybrook purchase price allocation was finalised within the measurement period, being a period not exceeding one year from the acquisition date, on the 21 June 2016 and the provisional values adjusted in terms of IFRS 3 paragraph 49. The adjustments to the prior period statement of financial position are summarised as follows:

Assets acquired and liabilities recognised	Estimated fair value at time of acquisition	Measurement period adjustments	Revised fair value at time of acquisition	Exchange rate difference	2015 R'000 Adjusted closing balance

Interest rate caps and swaps recorded in the cash flow hedging reserve, derivative asset and derivative liability (note 6) are regarded as level 2 financial instruments. Level 2 fair value measurements are those derived from inputs that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

The fair value of interest rate caps and swaps is calculated as the present value of the estimated future cash flows based on observable yield curves.

Interest rate caps were executed on 17 March 2016, with a maturity date of 20 July 2018. Interest rate caps were designated as cash flow hedges and executed to hedge the interest that is payable under various debt facilities with principal values of R1 810.0 million. The amount of the principal value designated as a hedged item is R980.0 million.

6. DERIVATIVE LIABILITIES

Closing balance

Opening balance	209 963	
Business combination		182 475
Loss recognised in other comprehensive income	6 513	
Gain recognised in profit and loss	(42 623)	
Foreign currency translation adjustment	2 448	27 488
Closing balance	176 301	209 963
Put option	170 053	209 963
Interest rate swap	6 248	
	176 301	209 963

The put option recorded in the derivative liability is regarded as a level 3 instrument for fair value measurement. Level 3 fair value instruments are those derived from inputs that are not based on observable market data (unobservable inputs). The fair value of the put option is determined using discounted cash flow analysis.

In terms of the Westbank operating agreement the remaining shareholders of Westbank Fishing Limited Liability Company ("Westbank") can put their 75% equity stake in Westbank to Daybrook Fisheries Incorporated ("Daybrook") or its nominee for a fixed price of USD31.5 million ("put option strike price"). If notice of the intention to exercise the put option is given by 30 November 2016, Daybrook will pay the remaining shareholders in Westbank an additional USD15 million when the put option becomes effective on 15 November 2017 ("put premium"). Should the put option be effectively exercised as described there will be a cash outflow, being the put option strike price plus the put premium as well as any unpaid distributions while there will be a cash inflow, based on prevailing market values, from a new US based shareholder acquiring the 75% Westbank shareholding.

2016	
R'000	

Audited year ended 30 Sept 2015 R'000

6. DERIVATIVE LIABILITIES (continued)

The put option liability was remeasured to fair value at 30 September 2016 by measuring the put option strike price plus the put premium to the fair value of Westbank Fishing Limited Liability Company. Westbank Fishing Limited Liability Company was valued using a discounted cash flow model and unobservable inputs including forecast annual revenue growth rates of 1.8% to 2.0%, forecast EBITDA margin of 22.6% to 25.6% and a risk-adjusted discount rate of 8.2%. A change in the discount rate by 1% would increase or decrease the fair value by R70.0 million. During the year a fair value gain of R42.6 million was recognised in operating profit.

The notional principal amount of the interest rate swaps at 30 September 2016 amounts to R1 136 million. This comprises hedges on the term debt of R1 894 million. The swap is to hedge the interest that is payable under the debt facility. During the year a fair value loss of R6.5 million was recognised in other comprehensive income.

7. DISPOSAL OF NON-CURRENT ASSETS HELD FOR SALE

7.1 Seasonal fruit business (CCS)

On 30 April 2016, the Group disposed of the Commercial Cold Storage fruit business.

9. ACQUISITION OF BUSINESSES

9.1 Foodcorp acquisition

The Group acquired hake, pelagic and lobster fishing rights and related assets from Foodcorp Proprietary Limited for a consideration of R355 million in the prior year. Foodcorp Proprietary Limited was acquired to enhance the Group's hake, pelagic and lobster footprint.

Assets acquired and liabilities recognised at date of acquisition:

9. ACQUISITION OF BUSINESSES (continued)

9.2 Daybrook acquisition

The Group acquired a 100% beneficial shareholding in Daybrook Fisheries for a consideration of R4 641 million in the prior year. Daybrook was acquired to enhance the Group's operations internationally in order to diversify its fishing rights and licences, fish species, operational geography and currency exposure.

At the time of reporting the results for the year ended 30 September 2015, the purchase price allocation of the Daybrook acquisition was not yet completed and hence the fair values of the identifiable assets and liabilities were provisional due to the uncertainty and nature in classifying intangibles and determining the useful life of the identified intangibles. The purchase price allocation was completed within the 12 months measurement period and the final fair value of the identified assets and liabilities are shown below. The statement of financial position at 30 September 2015 has been restated. Refer to note 2 for details regarding the purchase price allocation finalisation.

Assets acquired and liabilities recognised at date of acquisition:

Property, plant and equipment	907 083
Intangible assets	1 029 411
Investment in associate	127 733
Goodwill	2 787 759
Accounts receivables	266 700

14. **CONTINGENT LIABILITIES AND GUARANTEES**

The company and its subsidiaries have given cross suretyships in support of bank overdraft facilities of certain subsidiaries and the company. The company has given a letter of support to Calamari Fishing Proprietary Limited, Oceana Lobster Limited and Blue Continent Products Proprietary Limited. The company has guaranteed the long-term loan of R2 891.9 million (2015: R2 745.9 million). Furthermore, six (2015: six) of the subsidiaries in the Group have guaranteed the loan.

EVENTS AFTER THE REPORTING DATE 15.

Effective 1 November 2016, the remaining shareholders of Westbank Fishing Limited Liability Company exercised the put option in terms of the Westbank operating agreement. The exercise of the put option triggers the payment of the put option strike price plus the put option premium as well as any unpaid distributions on the put closing date, being 15 November 2017 (please refer to note 6). The exercise of the put option has no financial effect on the Group's financial position at 30 September 2016. No other events occurred subsequent to the reporting date that may have an impact on the Group's reported financial position at 30 September 2016, or require separate disclosure in the financial statements.

COMMENTS

FINANCIAL RESULTS

The Group has delivered strong results for the year ended 30 September 2016. Earnings per share increased by 34% and headline earnings per share increased by 20% primarily driven by the positive performance of our African operations underpinned by the inclusion of the full twelve months trading effect of the Daybrook (2015: three months) and Foodcorp (2015: eight months) acquisitions.

Group revenue is up by 34% to R8 244 million (2015: R6 169 million), mainly due to the inclusion of Daybrook for the full year, but also due to pleasing growth of 13% in our African operations. This growth has been achieved through strong volumes in canned fish, fishmeal and hake, supported by stable pricing and bolstered by a favourable exchange rate.

Operating profit has increased by 69% over the year to R1 730 million (2015: R1 026 million). Excluding the effect of Daybrook, operating profit from our African operations delivered a solid 24% increase attributed to the positive performance of the South African canned fish and fishmeal segment, as well as our hake and commercial cold storage and logistics (CCS) businesses. Furthermore, strong focus on cost containment and a refined canned fish procurement strategy contributed to the improved profitability over the year.

Other operating items consist of profit attributable to the sale of the Desert Rose fishing vessel, the Lamberts Bay Foods business and the CCS fruit business.

Net interest charged for the year of R363 million (2015: R97 million) relates to finance costs incurred on additional working capital facilities and long-term borrowings. The average interest rate for all debt is currently 7.1% per annum.

A final dividend of 357 cents per share has been declared which together with the interim dividend of 112 cents brings the total dividend for the year to 469 cents per share. This represents an increase of 28% on the 2015 dividends per share of 365 cents per share.

FINANCIAL POSITION AND CASH FLOW

Cash generated from operations for the year has increased to R1 631 million (2015: R1 095 million). An additional R100 million was invested in working capital in order to enable our frozen fish procurement strategy for the canned fish division. Proceeds of R188 million were generated in the year from the disposal of non-core and underperforming assets. At year end the Group had positive cash balances of R1 313 million (2015: R1 181 million) of which R735 million (2015: R787 million) is held in dollar denominated accounts.

At 30 September 2016, Group net debt is R3 417 million (2015: R3 470 million) of which R1 099 million (2015: R1 119 million) is denominated in US dollars. In line with our strategy to decrease our gearing, the net debt to EBITDA ratio at 30 September 2016 has improved to 1.7 times (2015: 2.9 times).

REVIEW OF OPERATIONS

Canned fish and fishmeal (Africa)

The canned fish division has experienced good volume growth during a challenging period for the traditional canned fish consumer. Sales volumes in South Africa grew by 15% driven by competitive pricing and continuity of supply. Overall, volumes were marginally impacted by declines in certain African geographies, resulting in net growth of 13% to 9,4 million cartons for the year (2015: 8,3 million cartons).

Historically the Total Allowable Catch ("TAC") in South Africa and Namibia contribute approximately 40% of the supply for our canned fish product. The remaining demand has over recent years been satisfied by a well-established network of third party canneries outside of South Africa and Namibia. The 2016 South African TAC for pilchard decreased to 64,928 tons (2015: 83,470 tons) and the Namibian pilchard TAC for 2016 decreased to 14,000 tons (2015: 25,000 tons). This decline in TAC, along with the depreciation of the Rand, has resulted in Oceana's canned fish procurement strategy transitioning from importing fully canned product towards the importing of frozen fish raw material for processing locally. This resulted in 46,230 tons of frozen fish being imported (2015: 15,421 tons) which enabled the division to utilise spare local production capacity to ensure continuity of supply in a year when food scarcity became a risk. This materially increased labour hours for our South African and Namibian workforce, particularly in our Amawandle (Foodcorp) acquired cannery where labour hours increased by over 125%.

The canned fish division has successfully navigated the challenges presented during the year resulting in an improved operating profit.

The 2016 initial South Africa anchovy A season TAC reduced to 354,326 tons (final A season TAC for 2015: 450,000 tons).

The South African fishmeal division has performed well with landings of industrial fish to the Group's fishmeal plants increasing to 186,960 tons (2015: 144,365 tons), largely due to the additional supply from the Amawandle (Foodcorp) acquisition and the commissioning of our Angolan plant in December 2015. The division also benefitted from operational improvements at both the Hout Bay and St Helena Bay facilities.

Global prices for fishmeal and fish oil remained fairly stable during most of the year under review, with a decline being experienced in the third quarter of the calendar year due to higher Peruvian quota announcements.

Profit from the African fishmeal operations was materially above that for the same period last year due to the combined effect of increased volumes, a favourable exchange rate and improved operational efficiencies.

Fishmeal and fish oil (USA)

In its first full year as an Oceana company, Daybrook's performance has been ahead of management's expectations. The 2016 Gulf Menhaden fishing season, which runs from April to the end of October, has seen landings of 687 million fish, an increase on the 650 million fish landed last year. The improved harvest rates are indicative of a robust gulf menhaden resource which has recently received a positive assessment by the Gulf States Marine Fisheries Commission.

Daybrook produced 50,993 tons of fishmeal and 27,545 tons of fish oil for the year at its plant in Empire resulting in a combined yield of 37.3% (2015: 35.5%) due to the oil yield being restored to above the historical levels of approximately 12.5%. Increased focus on plant operations and the impact of additional output from the new driers installed in 2015 has resulted in a material improvement in overall plant output capacity.

Overall sales volumes for Daybrook are up on the prior year. Although pricing was affected by Peruvian fishing toward the latter part of 2016, total revenue for the year is the highest in Daybrook's history at approximately USD130 million. Daybrook's operating profit of R668 million (USD43 million) is ahead of the expected returns for our first year of ownership.

Horse mackerel and hake

The 2016 Namibian horse mackerel TAC decreased by 4% to 335,000 tons (2015: 350,000 tons). The security of quota allocation in Namibia continues to be a concern and the resultant increased reliance on purchased quota has had a negative effect on operating profit for the year. Reduced owned guota also necessitated a critical review of the commercial performance of our third vessel and as a result the Desert Rose was sold in October 2015. This strategy enabled us to keep the Desert Jewel and Desert Ruby, operating at full capacity with catch rates remaining consistent with prior seasons. This has led to improved operating margins for this sector.

In South Africa the Precautionary Maximum Catch Limit for targeted catch of horse mackerel decreased by 8% to 38,656 tons (2015: 41,927 tons). The Desert Diamond did not fish in South Africa during the first six months as she was first deployed in Namibia, following which she underwent a planned dry-dock for her renewal survey. She resumed fishing in South African waters during April 2016. Catch rates for the second half of the year have been consistent with long-term historical trends and as a result the Desert Diamond restored its profitability for the second half of the fiscal year.

An oversupply of fish in the market and tough trading conditions in our traditional African markets placed continued pressure on horse mackerel prices, although the favourable exchange rate partially offset the effect of weaker dollar prices.

The 2016 hake TAC remained unchanged from the prior year (2015: 123,020 tons). Hake volumes have improved during the year despite the negative impact of a downward trend in size mix. Pricing has been solid in European markets and as a result revenue has shown good growth, further bolstered by a favourable exchange rate.

Catching and production costs have been well managed primarily due to further efficiencies from the integration of the Amawandle (Foodcorp) hake business and the benefit of lower fuel prices. As a result, hake profitability has improved significantly over the year.

Lobster, squid and French fries

The 2016 TAC for West Coast rock lobster increased by 7% to 1,924 tons (2015: 1,801 tons) and quota available to Oceana for the current season amounted to 264 tons (2015: 238 tons). During the year fishing rights for West Coast rock lobster expired and we operated on exemption along with the entire industry.

The lobster business showed a decline in profitability due to lower volumes landed as a result of materially lower catch rates experienced by the industry. This was marginally offset by the positive effect of good pricing and favourable exchange rates.

Fishing rights allocated to the squid division remained unchanged over the year. Squid profits improved this year due to firmer prices and increased landings on the prior year.

The French fries business was sold to Famous Brands on 1 August 2016. The business made a positive contribution to operating profit for the financial year under review.

Commercial cold storage and logistics (CCS)

The CCS business continued to deliver revenue growth, driven by record occupancy levels in its 11 cold stores. In response to the growing demand for frozen storage, the Paarden Eiland and City Deep facilities were upgraded to expand available frozen capacity. Continued focus on effective cost management practices and the Midrand sites coming to full fruition further supported performance and resulted in good operating profit growth for the year.

The fruit facilities business in Maydon Wharf, which was considered non-core to the CCS business, was sold during the year.

COMMENTS continued

PROSPECTS

The changing landscape in the canned fish space has provided a strong incentive for increased focus on improving our local processing competitiveness and supply chain efficiencies. There is a focus on extending the market for Lucky Star products in South Africa and elsewhere on the African continent.

We remain positive on the long term outlook for fishmeal and fish oil pricing due to global supply and demand dynamics. We anticipate that prices could in the short term be negatively impacted by increased Peruvian catches, and hope to mitigate this by improved total landings across our operations in South Africa, Angola and the USA. We continue to focus on opportunities to improve quality and yield in this sector.

Improvement in performance of our horse mackerel operations is dependent on our ability to secure quota in Namibia at favourable rates and the Desert Diamond catch rates increasing on the prior year. Our hake business is expected to continue to extract efficiencies in order to bolster growth.

Provisional quota allocations in terms of the 2016 Fishing Rights Allocation Process for horse mackerel and hake inshore have been announced. Several inconsistencies have been identified in the allocations and we are formulating our appeal thereto. The Department of Agriculture, Forestry and Fisheries have indicated that the outcome of the West Coast rock lobster allocations will be concluded once the TAC has been determined. In the interim, fishing will continue under an exemption granted earlier this year.

As anticipated, subsequent to the financial year end the remaining shareholders of Westbank Fishing exercised their put option. We have commenced with the process of finding a suitable US based partner to acquire the 75% equity stake.

In the immediate future Oceana's focus will be on consolidation of our businesses and the extraction of Group efficiencies. We will continue to build financial capacity over the medium-term to support further acquisitive growth.

On behalf of the Board

Chairman Chief executive officer

17 November 2016

CASH DIVIDEND DECLARATION

Notice is hereby given of dividend number 146. A gross final dividend amounting to 357 cents per share, in respect of the year ended 30 September 2016, was declared on Thursday, 17 November 2016, out of current earnings. Where applicable the deduction of dividends withholding tax at a rate of 15% will result in a net dividend amounting to 303.45 cents per share.

The number of ordinary shares in issue at the date of this declaration is 135 526 154. The company's tax reference number is 9675/139/71/2. Relevant dates are as follows:

Last day to trade cum dividend — Tuesday, 10 January 2017

Commence trading ex dividend — Wednesday, 11 January 2017

Record date — Friday, 13 January 2017

Dividend payable — Monday, 16 January 2017

Share certificates may not be dematerialised or re-materialised between Wednesday, 11 January 2017 and Friday, 13 January 2017, both dates inclusive.

By order of the board

JC Marais
